# GRILLING SAFETY

Hundreds of fires are started every year by using barbecue grills, and there can be extensive damage. Careless grilling can cost millions of dollars and often, destroys more than property.

## Protect Yourself & Your Family

In order to help you enjoy safe delicious grilling, remember to always do the following:

- Always use flame-resistant barbecue mitts and barbecue tools with long, heat-resistant handles.
- Have proper lid or grill top.
- Keep barbecue grills in a level position at all times. An unstable unit can easily be tipped over.
- Place barbecue grills at least five feet away from any combustible material.
- Place your grill so that sparks and smoke won't fly toward buildings, furniture or people.
- Use only enough charcoal to last for the time it will be needed.
- Properly attach your ash catcher to the kettle grill.
- Douse the coals thoroughly with water after grilling.
- Transport, store and use the propane gas cylinder in an upright position.

Here are some grilling behaviors that should be avoided to help protect you and your family against injury.

- Never leave infants, children or pets near an unattended hot barbecue grill.
- Never add liquid starter to hot or even warm coals.
- Never wear loose clothing around a hot barbecue grill; it could catch on fire.
- Never grill on a wooden deck.
- Never barbecue in a confined space.
- Never use gasoline, kerosene, alcohol or a cigarette lighter to start a fire.
- Never move outdoor barbecues indoors. Smoldering charcoal can build up lethal concentrations of carbon monoxide.
- Never store briquettes outside where they can get wet. When they are dry, they become a flammable solid creating a fire hazard.
- Never discard used briquettes in a cardboard carton or any other combustible container.
